

Benefits for Officers

Legal & Career Protection

Let's be honest, you're likely using SMS texting and public messaging apps for work related communication. This can get you and your agency in a tangled legal mess and even risk your career. You can easily avoid this by using a communication app like Evertel that is compliant with all federal and state-level legal requirements for officer communication.

Reduce the chance of your phone being subpoenaed

Because Evertel is an encrypted, cloud-based platform and all data is retrievable without the phone, it is unnecessary for legal to take possession of your phone in an investigation. This also makes it safe to use on your personal phones.

Military-grade data security

Your data is protected and secured through high-level data encryption within a secure, U.S. based, government-only cloud environment. In Evertel you can securely share intel, images, videos and audio without the risk of it being intercepted like it is when using SMS texting or public messaging apps.

Legal compliance

LE employees have specific laws and regulations they must follow regarding digital communication. Evertel meets all compliance requirements with federal (FOIA), state-level public information request laws, and CJIS.

Team Collaboration

Not only does Evertel streamline communication to keep you and your team informed, productive and on the street – it also saves you time.

Team collaboration in real-time

With Evertel, your squad can collaborate and share intel on and off shift in a single space with text, videos, images and audio from any location. No SPAM, no junk, just what's important.

Get intel faster

With Evertel's instant communication platform, no longer will you need to rely on emails or wait for briefings to gain intel. With Evertel intel is distributed directly and instantly to your phone, MDT and desktop.

Stay mobile

Evertel runs on your smartphone and MDT so you can maintain real-time communication with your squad and supervisors from any location, at any time.

Stay safe

Far too often officers are put in risky situations because of a lack of communication and bottleneck on the distribution of intel to those on the street. With Evertel intel is shared in real-time and it doesn't stop at the supervisor level. Evertel was created with the patrol officer in mind, ensuring intel is shared with those who need it, when they need it.

One-on-One Conversations

Evertel is not just for team collaboration. Connect with individuals and private one-on-one or small group conversations with full compliance.

Features you're used to

Evertel's direct messages (DM's) are for one-on-one or small group conversations just like texting or other messaging apps you may have used, only in a secure and compliant environment.

Connect with others outside your agency

Within Evertel, you can connect and have direct conversations with people inside or outside your agency. Connect with officers from neighboring agencies, county/state/federal LEOs, or anyone you need to converse with to do your job effectively.

Efficiency

Reduce the clutter and increase the communication so you can do your job better.

Reduce unnecessary radio chatter

Nobody likes to hear idle chat or irrelevant conversations on the radio. With Evertel, all non-emergency communication can be moved to a room within Evertel — keeping the radio clear of unnecessary traffic.

Reduce the systems you need to pay attention to

You are busy. Checking email, listening to unnecessary radio chatter, reading multiple chats/texts gets overwhelming. With Evertel, all important communication is delivered in a single place, allowing you to focus on your job at hand.

Save time on-duty

From booking prisoners to impounding, you can share sensitive information (CJI) to assist in expediting those processes in a safe & legal manner.
